Rebate Pricing Program

We know events can be expensive, so let us help you bring down the cost of your event! We offer a rebate of 50% of the drink profits made at the event.

How it works:

We will estimate the cost per drink, based on the quality of the spirits chosen (basic, medium or top shelf) and the ingredients used to create these drinks (ice, garnishes, cups, syrups, mixers etc.).

You can then choose 2 pricing models:
(Next page)

Rebate Pricing Program

Pricing Model #1:

The Near Cost Drink Model

We will sell liquor at or slightly above cost.

Example - Smirnoff vodka & soda with lime would be sold to guests for \$3.00

Rebate Pricing Program

Pricing Model #2:

The Rebate Model

We will sell the drinks at a higher price than the cost.

Example - Smirnoff vodka & soda with a lime would be sold to guests for \$5.00.

With the rebate model, \$2.00 profit a drink will be made - once the event is complete, half of this profit will be rebated back to the event host, helping with the cost of the event.

In addition, the event host has the option to choosing a higher price of their choice, therefore increasing their rebate!
